

# YOUR EMPLOYEES ARE ON THE FRONT LINE OF CYBER DEFENSE

**Untrained employees are the weakest link in your company's defense against cybercriminals. ResTech Solutions can help them become your strongest point of protection.**

## **CYBER-ATTACKS ARE ON THE RISE**

Because employees are 'trusting', they are the main target for cyber-criminals. Making sure your people stay up-to-date with what the latest attacks look like, and teaching them to recognize threats, is imperative to the security of your business. The threat landscape is constantly evolving, and so should your approach to defense.

**92.4%**  
of malware is  
delivered via email

## **TRAIN AND PHISH!**

Trained and aware employees are critical to securing an organization, and an effective, ongoing internal security awareness program can help reduce your company's vulnerability, turning the "weakest link" in your cyber defenses into its greatest strength.

Security awareness training and phishing simulations go hand in hand. Phishing has become very sophisticated and almost undetectable, as criminals have found ways to make their emails as realistic as possible. Phishing simulations test employees on how they would respond to a real-life phishing attack. ResTech Solutions sends mock attacks to your team at staggered times, avoiding the "prairie dog effect" where employees warn one another of the email, for the best measurement of all employees' awareness. We'll track which employees have clicked on a phishing email, who has given away their password and who has ignored the email.

Once a learning gap is detected, we'll deliver interactive educational videos to the most susceptible users. These easy

to-understand, short and visually engaging training videos include an online quiz to verify the employee's retention of the training content. Training can be delivered regularly to reinforce the importance of every employee's role in protecting your business.

**90%**

of security breaches  
are inadvertent,  
unintentional, and  
caused by human  
error

# PHISHING SIMULATION & SECURITY AWARENESS TRAINING

## TRAIN

It is not always disgruntled workers and corporate spies who are a threat. Often, it is the non-malicious, uninformed employee. Our easy-to-understand, short and visually engaging training videos end with an online quiz to verify the employee's retention of the training content.

## MICRO-TRAINING REFRESHERS

When employees finish training, to make sure they retain what they have learned and also be aware of what the latest threats that come out are ResTech Solutions sends weekly micro-training refreshers to your employee's email. These 45-90 second short and visually engaging videos ensure employee retention and awareness.

## PHISH

ResTech Solutions can send scheduled phishing campaigns, including customized messages to fit each team or department, at random times during a specified period. With an ever-changing threat, it is important that your employees are exposed to all the latest phishing traps set by criminals.

## MEASURE AND TRACK

ResTech Solutions provides a regular Security Threat Report that demonstrates the overall cybersecurity posture of your organization. When pairing employee training and phishing campaign results, with Dark Web Monitoring that includes any dark web credential compromises, you'll get a 360° combined view of your security posture.

## WHY YOU NEED AN INTEGRATED, ONGOING PROGRAM

- Cyber-attacks are on the rise; particularly among small- and mid-sized businesses.
- You may have the most up-to-date and strongest security systems in place, but this will be a wasted investment if you don't also train and test your staff.
- Threats are ever-evolving and become more sophisticated and harder to detect. Regular training on the latest criminal tactics will help mitigate risk.

**Your employees are your first and primary line of defense against online crime. Equip them with the knowledge and skills they need to protect themselves—and your business—from criminal elements.**
