One source for everything email

We empower organizations with a full arsenal of cloud-based email products so they can experience all the benefits of a robust, secure, & legally compliant email security & hosting platform. **Check out our complete range of products:**

[e] Bracket®

Bracket® is the painless email encryption product that's both secure and easy to use. Bracket lets people send encrypted email from any email client on any device by simply wrapping the [subject] in brackets... no plugins or software required.

CloudFilter™

Protect your users around the clock with CloudFilter™ email security. CloudFilter™ effectively stops spam, viruses, & malware in the cloud. Suspicious messages are held in quarantine for review, while good email is delivered to the end user.

SafeSend™

Stop bad email from leaving your organization while staying compliant. When your email users send out confidential files or messages caught as spam, it can severely damage the reputation of your business.

XtraMail™

With XtraMail™ your users can keep working through an email outage. XtraMail™ stores a rolling 30 day backup of all your email, so when your systems are down, your users can simply login to XtraMail™ to continue sending & receiving email.

SecureStore™

Email archiving with no storage and retention limits! SecureStore™ archives a copy of all incoming, outgoing, and internal email. Access your archive anytime to search and send stored mail via the secure and incredibly fast web console.

CloudMail™

CloudMail™ gives you an affordable, yet robust email hosting platform which includes contacts & calendars, a large mailbox, & access from anywhere. Manage via secure webmail console or email client via (POP3 or IMAP syncing).

E⁺ Exchange +

Supercharge your email hosting with the security & reliability of Exchange +. With Exchange +, we've combined numerous layers of security & continuity with the power of Exchange 2013, to give you the ultimate hosted email solution.
