

## ABOUT US

Hello, we are ResTech Solutions, a full-service IT company helping small businesses keep their information secure, and their processes running smoothly and efficiently. We commit to monitoring, diagnosing, and addressing the root causes of difficulties and nagging problems with technology so that people can focus on growing their businesses and serving their people.

We are not a temporary fix; we are a holistic and permanent solution.

## ABOUT ME

DAVID LEVINE, MBA  
CEO/FOUNDER

Hello, I am David, founder of ResTech Solutions.

I launched ResTech in 2011 to help small businesses with their tech needs through our automated monitoring systems, cutting-edge software, and our team. Many of our business functions rely on technology because when it works, it can make our life simpler and more efficient. That's why it has become a competitive advantage for companies around the world.

Now, having an in-house IT department is expensive. I wanted to provide the capabilities obtainable primarily by corporations to your small business at an affordable price point so that you, too, can run more efficiently and gain a competitive advantage in your industry.

Although my work revolves around technology, I prefer to work with people. That's why my team and I design tech solutions that create a more simple human experience. When our technology works, we can all thrive, drive progress, and do what we do better.

I'd love to talk to see how ResTech can help your business thrive.

## WHY RESTECH?

- We're set up to serve small businesses from 1 to 50 employees and bring corporate-level IT support to permanently solve your tech problems and protect you from complex cyberattacks.
- We offer unlimited tech support at an affordable monthly rate. You won't deal with any more bucket hours and surprising fees.
- Our innovative automated monitoring systems detect issues and resolve them automatically. You'll continue about growing your business with peace-of-mind as our software does all the work.
- You'll save money and stress by receiving permanent IT solutions and unlimited tech support, removing your need to hire an in-house specialist or team. We will also help you save by advising you on equipment and software designed to last for your workload.

## TESTIMONIALS

"ResTech provided me with peace of mind as they were able to recover all my important data and setup an encrypted cloud backup solution to protect my data."

- James Li, Financial Advisor

"There is no better way to understand the difference than by experiencing it. You will probably save some money in the process, not because they're cheap, but because they're good."

- Wendel Skolaski

"Since ResTech Solutions began managing our systems they have been able to resolve all the ongoing issues we had been dealing with through our previous IT service providers."

- Bob Pohl, Partner at Furnishings Unlimited

## MANAGED MONITORING AND AUTOMATION

Our Managed Services plan will help your business be proactive through our innovative automated monitoring system. Our software will detect issues in your computers and servers and resolve them automatically, giving you peace-of-mind from the moment you sign up. With this plan, you will also receive:

- Automation & monitoring service for endpoints
- Anti-virus & anti-malware protection
- Cybersecurity training
- Unlimited general support
- Client portal access for documentation
- Service portal access for creating service tickets
- Knowledge base access
- Peace-of-mind
- More efficient systems
- Stress relief

## MANAGED NETWORK AND BACKUP

In today's world, businesses, no matter their size, can't afford to be offline. With our Managed Network and Backup plan, you'll stay connected at all times, even when your internet is down through our LTE failover. You'll have peace-of-mind knowing your customers will be taken care of, and your business will run smoothly. Also included in this plan:

- LTE Router Failover
- Uninterrupted Internet Connection 24/7/365
- Unlimited general support
- 24/7/365 customer support
- Remote monitoring & troubleshooting
- Access points optimization
- Smart switches for network expansion
- Managed power
- Managed backups
- Network Stability and predictability

### ADDITIONAL SERVICES:

- Knowledge Base
- Backup Services
- Reputation Management
- Website Services

## CYBERSECURITY SERVICES

Cybersecurity is critical as the complexity and intelligence of cyber attacks are putting small businesses' sensitive data, information, files, and email at risk. In fact, "43% of all cyber breaches claimed small businesses as victims" (Forbes). We want to help protect your business's private information. Our cybersecurity services include:

- Cybersecurity risk assessment
- Cybersecurity platform
- Dark web monitoring
- Cybersecurity network & email protection
- Email spam & phishing protection
- Web filtering
- Privacy Protection
- Live 24/7 Monitoring
